

ELECTRICAL CONTRACTORS & POWER INFRASTRUCTURE EDITION

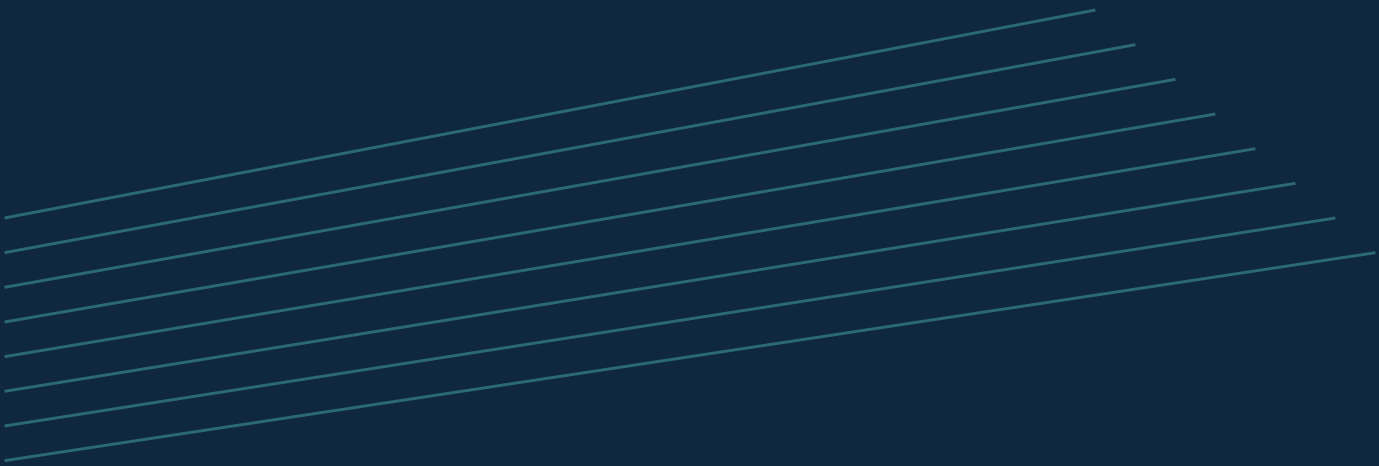

MyDataCenterScout

OCTOBER 2026

Public Sample Construction Intelligence & Contractor Watchlist

A research-quality excerpt for electrical contractors

PUBLIC SAMPLE · NOT A LIST OF ACTIVE BIDS

PUBLIC-SOURCE RESEARCH / UNITED STATES

PUBLIC SAMPLE · NOT A LIST OF ACTIVE BIDS

Electrical Contractors & Power Infrastructure Edition

Research cutoff: October 10, 2026 | United States

This report identifies construction projects and potential contractor pursuit pathways based on publicly available information. No currently open electrical bid packages were verified for the five featured projects as of October 10, 2026. Inclusion does not guarantee bidding access, subcontracting opportunities, or contract awards.

This sample demonstrates the research format and evidence standards without reproducing the full paid report. It is not a list of active bids.

Public comparison snapshot

Rank	Project	Score	Procurement classification
1	River Bend, Louisiana	83/100	Verified contractor engagement route; no confirmed open bid
2	QTS Fayetteville / Project Excalibur, Georgia	79/100	Verified contractor engagement route; no confirmed open bid
3	AVAIO Taurus, Brandon, Mississippi	75/100	Verified contractor engagement route; no confirmed open bid
4	Crusoe / Google Armstrong County, Texas	73/100	Active project; procurement route unverified
5	Serverfarm ARK, Clarksville, Arkansas	71/100	Active project; procurement route unverified

Featured profile — River Bend, Louisiana | 83/100

Hut 8 announced a 15-year lease for **245 MW of IT capacity** at River Bend. Jacobs announced on January 8, 2026 that it had been selected as the project's EPCM lead. Jacobs' release scheduled completion and commissioning of the initial data hall for Q1 2027, with additional halls across 2027. Those are forecasts from the release date, not confirmation of October field progress. [\[R1\]](#), [\[R2\]](#)

Electrical relevance: A 245 MW IT facility implies major power distribution, backup, protection, utility coordination, and commissioning needs. This is an industry-level implication, not confirmation of any awarded or available trade package.

Procurement classification: Verified contractor engagement route, but no confirmed open bid. Jacobs' public supplier page points prospective providers to Ariba Discovery; selected firms may be separately invited to prequalification. This is general supplier discovery, not River Bend access or a bid invitation. [\[A1\]](#)

Next action: Ask Jacobs/Hut 8 which entity owns River Bend electrical qualification, whether any relevant scopes remain unawarded, and what schedule and formal prequalification apply.

Unknown: Electrical contractor, engineer, suppliers, package awards, bid dates, and current field schedule were not verified.

The five projects, at a glance

- **QTS Fayetteville (79):** Project page names Clayco and HITT in site-construction context and includes dated content from April 24, 2026. Brasfield & Gorrie publishes a general trade qualification route, but QTS has not been shown to assign B&G to a particular Excalibur building. No electrical bid verified. [\[R3\]](#), [\[R4\]](#), [\[A2\]](#), [\[A3\]](#)
- **AVAIO Taurus (75):** Yates is the named GC; AVAIO reported an Entergy electric-service agreement and a 116 MW phase. Yates' trade-partner page is a company-wide inquiry route, not a Taurus bid invite. Current package status unknown. [\[R5\]](#), [\[A4\]](#), [\[A5\]](#)
- **Crusoe / Google Armstrong County (73):** Crusoe's September 28, 2026 release says construction is underway. No campus-specific GC, electrical contractor, or formal trade procurement route was verified. Watchlist only. [\[R6\]](#)
- **Serverfarm ARK (71):** Serverfarm's undated live page says construction/site preparation is underway and plans first-two-building completion by January 2028. It lists info@sfrdc.com for general questions; no GC or procurement portal confirmed. Watchlist only. [\[R7\]](#)

How to read the research

- **Confirmed:** stated in a cited source.
- **Reported:** attributed to a company or public record; not independently established here.
- **Interpretation:** research view about trade relevance, not an award or bid fact.
- **Unknown:** not established by sources reviewed.

Scores prioritize research follow-up based on electrical relevance, timing, procurement visibility, contractor access, scale, and source freshness. They do not predict awards, show open bids, or assess your company's personalized fit.
